I build dependable web products, from backend systems to thoughtful user interfaces. I work with Rails, PostgreSQL, Vue, React, TypeScript, and Svelte. I focus on clear architecture, practical product decisions, and software that remains reliable over time.

01 EXPERIENCE

Independent Software Developer

[Public profile](#) ↗

Karlancer / 2025-Present

- Completed 10+ paid client engagements across web applications, JavaScript, Kotlin/Android, and related technologies.
- Maintained 100% on-time delivery and project success, earning consistent praise for accuracy and creative problem-solving.

02 SELECTED WORK

SatrYar SVELTE / TYPESCRIPT

[satryar.ir](#) ↗

Persian-first document studio that turns raw text into polished Word and PDF files while keeping source documents on the user's device.

Cinemad RAILS / VUE / POSTGRESQL

[cinemad.emadrahimi.dev](#) ↗

Film-discovery product with search, filtering, authentication, profiles, watchlists, and ratings across a Rails API and Vue interface.

Retrynaut NODE.JS / JAVASCRIPT / CDP

[github.com/ersync/retrynaut](#) ↗

Released npm CLI and background agent that detects Antigravity high-traffic failures and retries safely through the Chrome DevTools Protocol.

Skeleton Loader RUBY / RAILS / CSS

[github.com/ersync/skeleton-loader](#) ↗

Ruby gem for generating responsive skeleton loading states in Rails without client-side dependencies.
